Biolume's Skincare: The Power of Ingredients

At Biolume, we blend advanced skincare science with nature's most powerful ingredients, especially those rooted in Korean beauty rituals. Our products are designed to nourish, hydrate, and rejuvenate the skin using handpicked elements.

Key ingredients like Jeju Cherry brighten and even out skin tone, while Bija Green Tea calms irritation and protects against environmental stressors. Snail Mucin, rich in proteins and glycolic acid, deeply hydrates and repairs the skin, promoting a natural glow. Jojoba Oil mimics the skin's natural oils, moisturizing without clogging pores.

We also incorporate powerful actives like Niacinamide to minimize pores and reduce dark spots, and Vitamin C, which brightens skin and boosts collagen production. Kaolin, a gentle natural clay, detoxifies the skin, and Mulberry Extract helps improve skin tone and fight signs of aging.

Every Biolume product is crafted to bring out your skin's natural beauty.
